CONTACTS

The WWB Drink System Tank Shifter automatically switchches from one tank to the other when one of the tanks run empty. This ensures non-stop beer flow and prohibits lost beer time during the switching of the tanks. The appropriatie cooling and proper light protection of the 0,7L cistern keeps the beer cold and minimizes growth of yeast culture. The Tank Shifter can be used both in combination with 1000 liter tanks or with serial connected kegs.

TANK SHIFTER 1000 L

- Features:
- IP44 classified
 - Cooled 0,7 L cistern with automatic air evacuation.
 - Activated by low pressure level or low fluid level.
 - Indication LED for empty tank.
 - High quality pneumatic valves.
 - Capacity: 70L/min 2.5 bar with 16 mm tube fittings.
 - Standard tube fittings: 16mm.
 - Air pressure / CO2 requirements: 4-6 bar.

- Technical data:
- Supply voltage: 24 VDC.
 - Dimensions: 255mm(w) x 580mm(h) x 170mm(d).
